Employment History

Tech Lead Frontend Developer, Alar, Budva

February 2022 - Present

- Configured project from scratch (webpack, linters, CI/CD).
- Developed architecture patterns, which significantly reduced onboarding time of new team members.
- Revamped cross-code review procedures to substantially boost speed and efficiency, elevating the overall review process.
- Implemented an alternative method of building dev server with Vite, reducing compiling time by 10 times.
- Ensured proper documentation of the code, making it easy for team members to understand and contribute.

Senior Frontend Developer, Alar, Budva

January 2021 - February 2022

- Identified and optimized frontend performance bottlenecks to enhance the speed and efficiency of web applications.
- Ensured that web applications comply with accessibility standards, making them usable for people with disabilities.
- Actively participated in project planning meetings and provided technical insights to facilitate effective decision-making.
- Implemented new features based on project requirements, ensuring timely delivery and alignment with established coding standards.

Frontend Developer Digicode, Kyiv

January 2019 - January 2021

- Identified and resolved front-end bugs, UI glitches and performance issues.
- Collaborated with the team to implement new features based on project requirements.
- Participated in code reviews, provided constructive feedback.
- Ran tests and ensured cross-browser support.
- Used Axios library to fetch data from server, serialized and rendered it.

Education

Bachelor Taras Shevchenko National University of Kyiv, Kyiv

September 2014 - July 2018
